

Fun Ambiguous Images

Two people can look at the same image and see totally different things. Sometimes people see the same thing differently. This is also true of how we each see things that happen. Look at some pictures which can be seen in different ways.

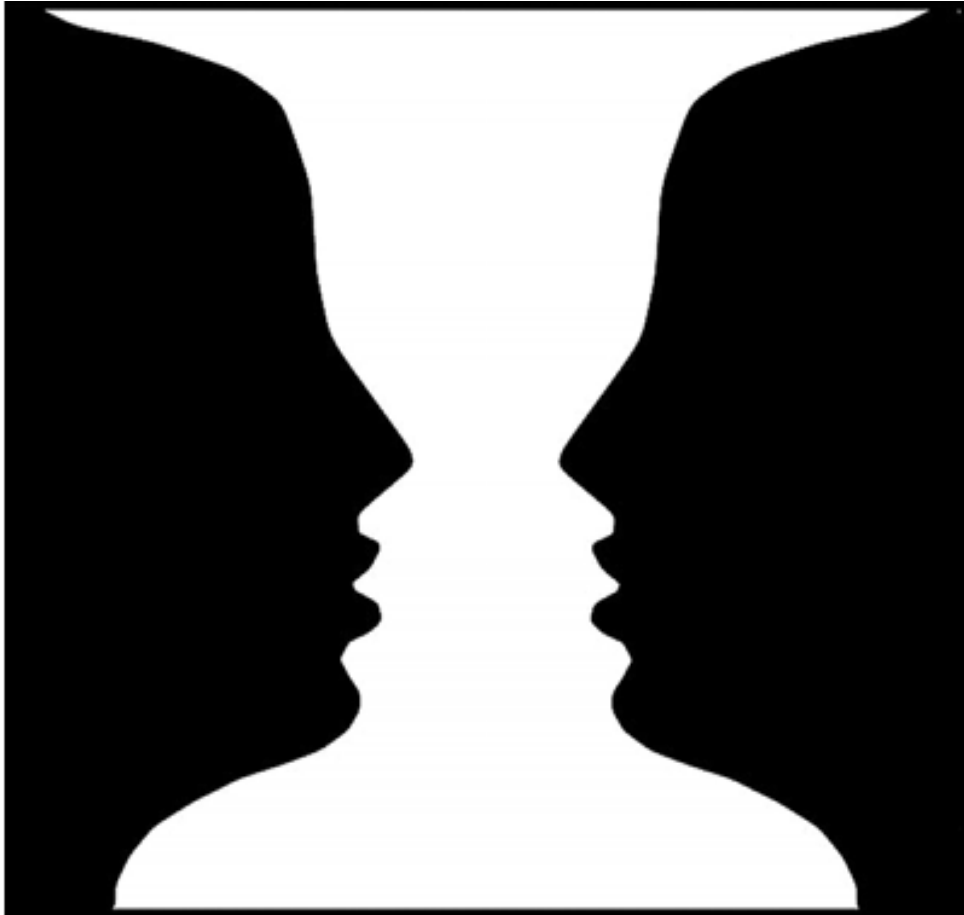

Have a look at this Necker cube...

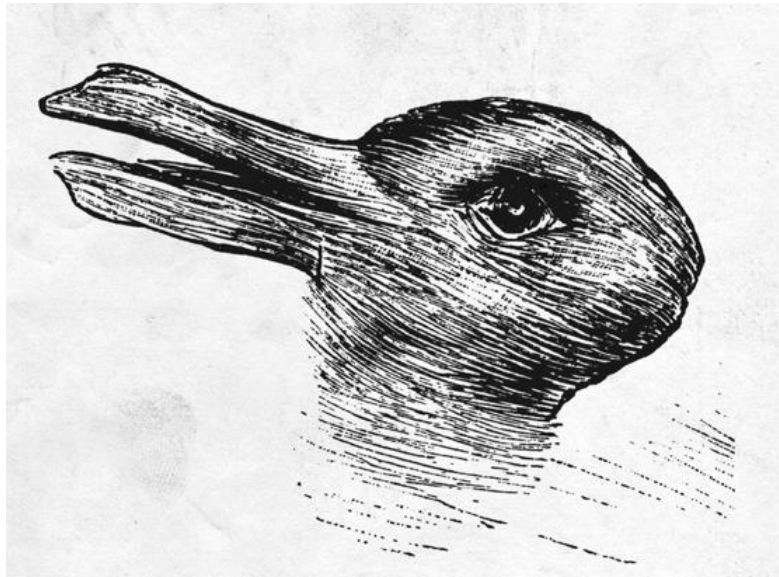

The cube can be seen in two different ways: facing down and to the left or up and to the right

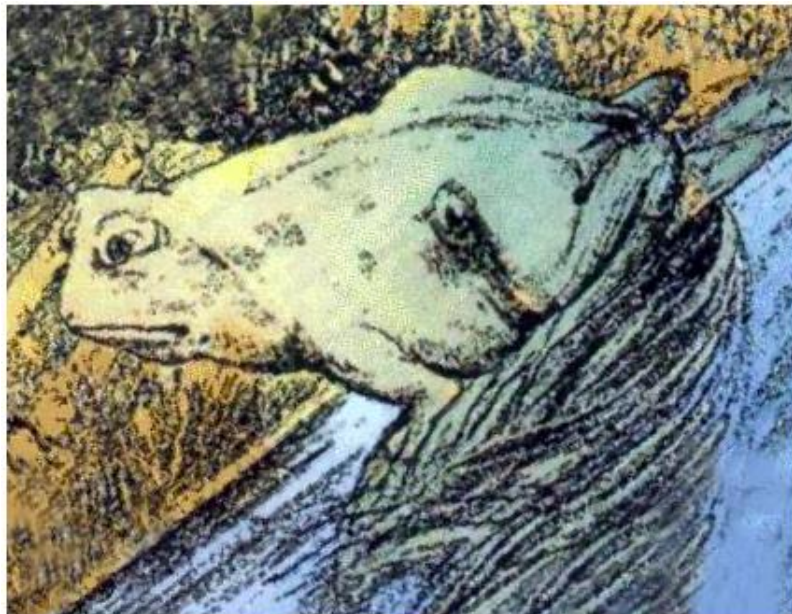

This illusion is known as "Rubin's Vase," though the image could also be accurately described as "Rubin's faces. Can you see both the faces and the vase?

Which animals can you see in the following image? Can you see the duck and the rabbit?

Which did you see first: a horse or a frog? There is no correct answer of course!

Can you see the donkey? What about the seal?
